PRODUCT CATALOGUE

SUSTAINABILITY AS A

CORE VALUE

At Tazo Professional, Sustainability is at The Heart of Everything We Do.

We understand the importance of impeccable hygiene in commercial spaces to elevate guest experience and ensure effective maintenance. We are dedicated to helping businesses meet their cleaning needs with zero or minimal impact on the environment. Our cleaning range goes beyond ordinary cleaning with a focus on scientific innovation & environmental responsibility.

ENVIRONMENTAL RESPONSIBILITY

Our range of formulations have been developed after years of research by a team of highly experienced biotechnologists to deliver effective, sustainable cleaning solutions. Our cleaners are non-toxic and biodegradable, thus causing no pollution to the environment we live in. Our products are intentionally designed with ESG goals in mind so business can make a switch to sustainable cleaning solutions without additional or upfront investments.

SUPERIOR ENZYME TECHNOLOGY

Tazo Professional is powered by a proprietary enzyme technology in its cleaning solutions, targeting diverse cleaning challenges. The proprietary enzyme technology works at a molecular level, swiftly breaking down dirt, grime, organic compounds like uric acid, and stubborn grease. Tazo Professional cleaning solutions are enhanced with a combination of these potent enzymes and high-quality bioactive ingredients, ensuring efficient and environmentally sustainable cleaning solutions.

Rethink Your Current Cleaning Choices

Conventional chemicals cleaners are made of highly toxic and corrosive ingredients which in the long term is harmful for our planet, people and property.

CONTAMINATES OUR ENVIRONMENT

Chemicals cause widespread environmental damage when they enter our water bodies. About 80,000 to 140,000 chemical contaminants from cleaning products can be found in our wastewater, causing widespread disease and pollution.

HUMAN HEALTH AT RISK

Conventional cleaning chemicals release harmful Volatile Organic Compounds (VOCs) that accumulate in indoor environments, making them unsafe for your guests. These VOCs can trigger allergic reactions and are known to cause respiratory illnesses. Accidental spillage of conventional cleaners cause acid burns, blisters, or other severe skin reactions that are unsafe for your staff.

CORROSION OF PROPERTY

Conventional chemical cleaners are highly acidic or alkaline which gradually inflicts damage on surfaces, leading to a loss of sheen due to micro-erosion over time.

DISRUPTION OF STPs

Chemical cleaners disrupt the biological balance within STPs or septic tanks, as they kill beneficial micro-organisms responsible for breaking down human waste. Partial decomposition of waste causes ground water pollution and the spread of diseases.

Responsible Cleaning with Tazo Professional

Our mission is to elevate hygiene standards and help organizations achieve their ESG goals. We are conscious about the safety of our property, people and planet.

BIODEGRADABLE

Our products are designed with ESG goals in mind, incorporating plant-based and biodegradable formulations.

WATER CONSERVATION

We actively promote water conservation efforts with our water-saving solutions.

EMPLOYEE SAFE

Embrace natural and sustainable hygiene solutions that keep your staff's health & safety in mind.

STP-SAFE

Our solutions do not disrupt STPs, thus preventing problems such as ground water pollution, sludge buildup and reverse gas

A hand wearing a blue nitrile glove is shown pouring a clear liquid from a test tube into a beaker. The beaker already contains a blue liquid with bubbles. In the background, there are several other beakers and test tubes, some containing blue liquid. To the left, there are green fern-like plants. The overall scene is set in a laboratory or scientific environment with a blue and green color palette.

OUR PROPRIETARY

ENZYMATIC

TECHNOLOGY

Tazo Professional proprietary blend of enzymes and high quality bioactive ingredients delivers effective and sustainable cleaning solutions.

The Superiority of our Enzymatic Technology Compared to Regular Cleaning Solutions:

UNRIVALED ODOUR CONTROL

(Patent Pending: An Eco-Friendly Bio-Based Odour Management Formulation)

Enzymatic technology unlike chemical cleaners and air freshener's do not mask odour in washrooms but eliminates undesirable bacteria and foul odour at the source. Enzymes speed up biochemical reactions that happen in nature. Tazo Professional's powerful enzymes breakdown complex components like crystallized uric acid deposits into smaller particles that can be easily washed away.

NON-CORROSIVE CLEANING

Enzymatic cleaners are non-corrosive and deliver superior cleaning without causing damage to surfaces even after prolonged use and also elongate the life of assets.

POWERFUL STAIN REMOVAL

The combination of powerful enzymes penetrates deeper into surfaces and removes stubborn dirt & grime at a molecular level which a conventional chemical cleaners fails to do. The potent blend of enzymes and bioactive ingredients eliminate germs, gives an extra dirt lift, leaving your surfaces clean and shiny.

DEGREASING EXPERTISE

Fats, Oils, and Grease issues in commercial spaces cause blockages and odour issues. Our enzymatic formulation gives effective degreasing with a clean non-sticky finish to surfaces and maintains clear drains. It also saves money as with regular use no expensive pump outs of the drain are required.

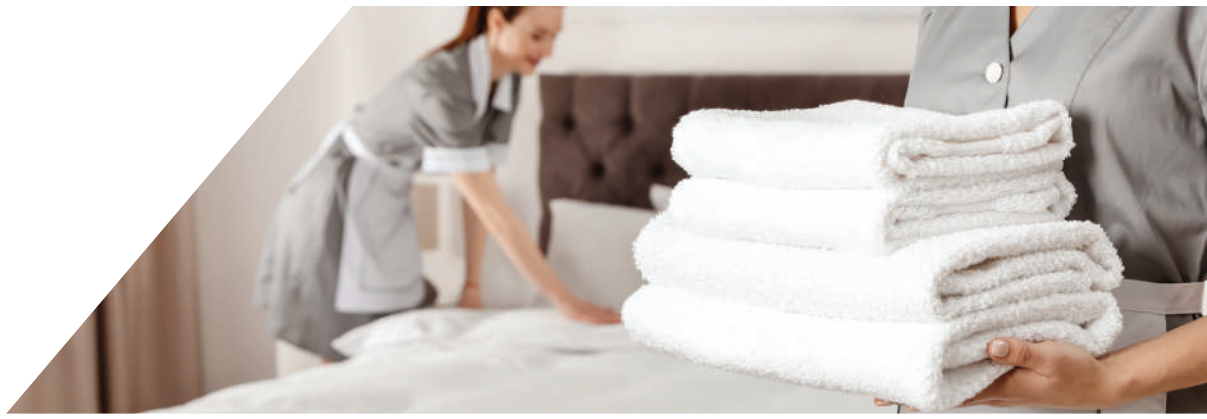

We cater to a wide range
of Industries like

**Hospitality, Corporate
offices, Education,
Foodservice, Manufacturing
facilities.
and Healthcare.**

WASHROOM ODOUR CONTROL RANGE

Common washrooms deal with a constant influx of visitors. Frequent usage of urinals leads to the deposition of uric acid crystals in the drain pipe leading to release of ammonia gas causing persistent odour issues. Traditional chemical cleaners and air fresheners mask unpleasant smells without addressing the root cause.

Tazo Professional's enzymatic odour control solution is uniquely formulated to eliminate odour causing germs at their source. It does not mask odours in washrooms but speeds up the biochemical reactions that happen in nature. Powerful enzymes breakdown complex components like crystallized uric acid deposits into smaller particles that can be easily washed away.

Say goodbye to unpleasant odours as we ensure a lasting and refreshing experience for high-traffic washrooms.

STP-safe

Biodegradable

Free from toxic VOC's

Eliminates odour at source

Saves Water

Enzyme based

F50 URINAL SPRAY SYSTEM

ELIMINATES ODOUR & ENSURES FRESHNESS

GOODBYE
Bad Odour

WELCOME
Fresh & Fragrant Washrooms

PREVENT
Hardware Changes

Areas of application: Urinals and surrounding areas.

Dilution: Dilute 100ml in 1L water for each urinal

F51 URINAL DRAIN CLEANER

ELIMINATES ODOUR & MAINTAINS CLEAR DRAINS

GOODBYE
Urine Deposits & Bad Smell

WELCOME
Odour-free Washrooms

PREVENT
Uric Acid & Organic Waste Build-Up

Areas of application: Urinals.

Dilution: 100 ml in 1 ltr of water

TAZO PROFESSIONAL ELIMINATES ODOUR AT SOURCE

HOUSEKEEPING RANGE

Enzyme based

H2 MULTI-PURPOSE CLEANER

CLEAN STREAK-FREE FINISH, 99.9% GERM REMOVAL

GOODBYE
Stains
& Dirt

WELCOME
Effortless
Cleanliness & Shine

PREVENT
Surface
Corrosion

Areas of application: Suitable for cleaning doors, handles doorknobs, glass tops, tables, chairs, appliances, cabins, etc

Dilution: General cleaning- 20ml in 1L water, Heavy soiling- 30-50ml in 1L water

H3 GLASS CLEANER

STREAK-FREE FINISH WITH SPARKLING SHINE

GOODBYE
Stains, Dirt and
Fingerprints

WELCOME
Streak-free &
Clean Sparkle

PREVENT
Corrosion of
Surfaces

Areas of application: All types of glass, mirrors, windows, glass doors, vinyls, laminates, T.V. & computer screens, etc.

Dilution: General cleaning- 20ml in 1L water | Heavy soiling- 50ml in 1L water

H7 FLOOR CLEANER

SPOTLESS SHINE, 99.9% GERM REMOVAL

GOODBYE
Dirt, Stains, Spots
& Germs

WELCOME
Clean floors with
Lasting Freshness

PREVENT
Corrosion of
Surfaces

Areas of application: All kinds of Floors, Kitchen Tops, Table Tops, etc.

Dilution: General cleaning- 20ml in 1L water, Heavy soiling- 30-50ml in 1L water

HOUSEKEEPING RANGE

H5 AIR FRESHENER LAVENDER

PLEASING SWEET AROMATIC INDULGENCE

GOODBYE
Bad Odour

WELCOME
Lasting Freshness

Areas of application: Guestrooms, office rooms, banquet halls, lobby etc.

Dilution: Ready to use.

H5 AIR FRESHENER LEMONGRASS

TRANQUIL & MEDITATIVE AROMATIC INDULGENCE

GOODBYE
Bad Odour

WELCOME
Lasting Freshness

Areas of application: Guestrooms, office rooms, banquet halls, lobby etc.

Dilution: Ready to use.

H5 AIR FRESHENER LEMON & MINT

REFRESHING AND SCINTILLATING AROMATIC INDULGENCE

GOODBYE
Bad Odour

WELCOME
Lasting Freshness

Areas of application: Guestrooms, office rooms, banquet halls, lobby etc.

Dilution: Ready to use.

H1 BATHROOM CLEANER

SPARKLING CLEAN WASHROOMS WITH LASTING FRESHNESS

- 

GOODBYE
Soap Scums,
Stains and Bad
- 

WELCOME
Clean Fresh
Washrooms
- 

PREVENT
Corrosion of
Surfaces

Areas of application: Washrooms, toilet floor, walls, tiles, slabs, bath tubs, wash basins, taps, faucets, etc.

Dilution: Normal Cleaning : 20 to 30 ml in 1 ltr water. Heavy cleaning : 50 ml in 1 ltr.

H6 TOILET BOWL CLEANER

SPOTLESS FINISH WITH LONG-LASTING SHINE

- 

GOODBYE
Stains, Water Ring
& Bad Odour
- 

WELCOME
Clean Fresh
Washrooms
- 

PREVENT
Scales &
Corrosion

Areas of application: Western toilets, Indian toilets, bio toilets and urinals.

Dilution: Ready to use.

H9 HARD WATER STAIN REMOVER

ELIMINATES STAINS & GIVE PERFECT SHINE TO SURFACES

- 

GOODBYE
Hard Water Stains
- 

WELCOME
Clean Shine
- 

PREVENT
Surface Corrosion

Areas of application: Taps, faucets, shower panel, glass, bath tubs, washbasins,

Dilution: 200 ml in 1 ltr of water

HOUSEKEEPING RANGE

H12

**HEAVY-DUTY
DEGREASER**

CUTS STUBBORN OIL, GREASE AND GRIME DEPOSITS ON SURFACES

GOODBYE
Oil, Grease and
Grime Deposits

WELCOME
Clean Non-Sticky
Kitchens

PREVENT
Corrosion of
Surfaces

Areas of application: Greasy, oily and grimy surfaces, stubborn and dried food on kitchen platforms, kitchen floors, chimneys, etc.

Dilution: Heavy Degreasing - Use concentrated products
Regular Degreasing - 50-100ml in 1L water

H4

**FURNITURE
POLISH PROTECTOR**

ENHANCED APPEARANCE AND PROTECTIVE SHIELD FOR WOODEN SURFACES

GOODBYE
Dirt, Dust &
Dullness

WELCOME
Shiny & Glossy
Furniture

PREVENT
Fading of Wood's
Natural Gloss

Areas of application: All wooden furniture & wooden surfaces.

Dilution: Ready to use.

H10

**STAIN REMOVER
FOR HARD SURFACES**

ELIMINATES HARD SURFACE STAINS

GOODBYE
Tough Stains

WELCOME
Clean Stain-Free
Surfaces

PREVENT
Stain Build-Up on
Regular Use

Areas of application: Tiles, marble, granite, ceramic, etc.

Dilution: Ready to use.

H11 **CARPET AND UPHOLSTERY CLEANER**

REMOVES DIRT, STAINS & ODOUR, RESTORES BRIGHTNESS

GOODBYE

Dirt, Stains,
& Bad Odour

WELCOME

Clean & Fresh
Upholstery & Carpet

PREVENT

Fabric damage with
pH-balanced Formula

Areas of application: Carpets, rugs, fabric and leather upholstered sofa, couch, office chairs & mattresses

Dilution: Normal cleaning: 50 ml in 1 ltr water, Heavy Cleaning: 100 ml in 1 ltr water

P40 **LIQUID SOAP LEMON**

REMOVES GERMS & ENSURES FRESHNESS

GOODBYE

Dirt &
Germs

WELCOME

Clean,
Soft hands

PREVENT

Harsh Chemicals &
Skin Dryness

Areas of use: Washrooms in offices, hotels, guest rooms, banquets etc.

Dilution: Ready to use.

P41 **PREMIUM SANITISING LIQUID SOAP FLORAL**

SOFT, CLEAN & FRESH WITH 99.9 % GERM REMOVAL

GOODBYE

Dirt &
Germs

WELCOME

Clean,
Soft hands

PREVENT

Harsh Chemicals & Skin
Dryness

Areas of use: Washrooms in offices, hotels, guest rooms, banquets etc.

Dilution: Ready to use.

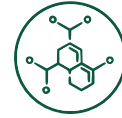

KITCHEN RANGE

Tazo Professional enzymatic cleaners provide solution for kitchen hygiene, that is natural, powerful, cost efficient and also saves water.

The powerful enzymes delivers effective degreasing on surfaces providing clean, germ-free, non-sticky surfaces. It maintains clear drains with powerful drain cleaner solution which eliminate grease blockages, speeds up the decomposition of food waste and also saves money by reducing the frequency of expensive pump outs. The dish wash gel effectively removes grease and stains from the dishes without leaving behind any toxic chemical residue. It also provides quick cleaning action with easy rinse off formula.

**Clean, fresh, germ-free kitchens
guaranteed with Tazo Professional.**

Enzyme based

Biodegradable

Prevents clogging & backflow

Saves labour hours

No regular expensive pump-outs

Degrades all types of food waste

K30

DISHWASH LIQUID

CUTS OIL, GREASE AND BURNT ON FOOD WITHOUT CHEMICAL RESIDUE

GOODBYE
Oil, Grease
& Stains

WELCOME
Clean Sparkling
Utensils

PREVENT
Chemical
Residues

Areas of application: Stainless steel, aluminium, brass, copperware, glassware, melamine, crystal and non-stick ware

Dilution: 20-50ml in 1L water

K31

KITCHEN DRAIN CLEANER

UNCLOGS SINKS AND DRAIN PIPES

GOODBYE
Oil, Grease and
Food Blockages

WELCOME
Clean Unblocked
Drain & Sink

PREVENT
Corrosion of Drain
Pipes

Areas of application: Kitchen drains & kitchen grease traps.

Dilution: Dilute 10g in 500 ml water
