TRANSFORMING TERRACES INTO INSPIRING GREEN SPACES

At PRATISTHA, we believe that every terrace has the potential to be a functional, beautiful, and sustainable space. Whether you dream of a lush green garden, a vibrant outdoor seating area, or a self-sustaining organic farm, we bring your vision to life. With expertise in container gardening, vertical gardening, protective structures, and innovative outdoor solutions, we provide end-to-end services to create eco-friendly and aesthetically pleasing spaces that add value for years to come.

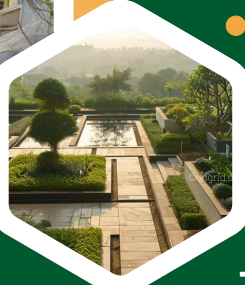

VISION AND MISSION

VISION

To transform urban spaces into green, sustainable, and functional havens by integrating smart, eco-friendly solutions.

MISSION

To create sustainable, eco-friendly urban environments by integrating smart gardening solutions that enhance aesthetics, functionality, and environmental well-being.

Selection &
Supply of
Plants

Container & Vertical Gardening

We specialize in setting up container gardening and vertical gardening solutions to help you grow organic vegetables, herbs, and flowers effortlessly.

- **Container Gardening:** We manufacture grow bags, resin-cast outdoor pots, decorative stands, and trellises with flexible arrangements to maximize space utilization.
- **Vertical Gardening:** Our sleek, corrosion-resistant vertical garden structures enable innovative, space-saving planting for lush green ambiance. Ideal for growing herbs, berries, and fruits throughout the year

Growing Media (Soilless Farming)

To ensure lightweight and high-yield cultivation, we offer PRAKRITI GOLD, a specially formulated growing media developed in collaboration with ICAR - IIHR (Indian Institute of Horticulture Research). It replaces traditional soil while improving plant health and growth.

Composed of coco-peat, neem cake, perlite, vermi compost, and vermiculite, it is ideal for organic farming without adding extra weight to your terrace.

Protective Structures: Shade & Net Houses

To create a controlled environment for plants, we design and install shade houses and net houses with:

- Customized shading materials to regulate sunlight for optimal photosynthesis.
- Sliding shade net designs for flexible light control.
- High-quality pest nets to protect plants from insects and birds.

Outdoor Furniture & Fixtures

We manufacture high-quality outdoor furniture and fixtures for terrace gardens, including:

- Metal structures with zinc-rich primer and PU-epoxy coating for durability.
- FRP top benches, tables, and flower pot stands for zero-maintenance solutions.
- Anti-slip, heat-proof wooden finish flooring decks for a comfortable walking experience.

Automated Drip Irrigation & Fogger Systems

We offer smart watering solutions to keep your terrace garden thriving with minimal effort:

- Drip Irrigation: Automated systems designed for efficient water distribution with digital control mechanisms.
- Fogger & Misting Systems: Helps maintain humidity, cooling, and nutrient supply, enhancing plant growth and yield.

Selection & Supply of Plants

We provide and plant a wide range of vegetables, fruits, herbs, and ornamental plants based on your preferences:

- Kitchen Garden
- Medicinal Plants
- Green Walls & Vertical Gardens
- Fruits & Berries
- Flowers & Avenue Plants
